Index of Back Issues

Listing of papers previously published in the *Journal of Manufacturing Systems* for years 1982 through 1987.

Volume 1/No. 1
1982

A Survey of Flexible Manufacturing Systems
C. Dupont-Gatelmand, Renault Machines Outils

The Automated Manufacturing Research Facility of the National Bureau of Standards
J. Simpson, R. Hocken, J. Albus, National Bureau of Standards

Statistical Analysis of Positioning Error of a CNC Milling Machine
A. Donmez, C. Liu, M. Barash, Purdue University
R. Mirski, Harvard University

The Human Element: Its Impact on the Productivity of Advanced Batch Manufacturing Systems
A. Blumberg, Fairleigh Dickinson University
A. Alber, Bradley University

Simulation and Graphical Animation of Advanced Manufacturing Systems
H. ElMaraghy, McMaster University

Direct Clustering Algorithm for Group Formation in Cellular Manufacture
H. Chan, D. Milner, University of Aston in Birmingham

Job Shop Scheduling—A Systematic Approach
E. Dar-El, Technion, Israel Institute of Technology
R. Wysk, Virginia Polytechnic Institute and State University

Technical Investment Planning of Flexible Manufacturing Systems—The Application of Practice-oriented Methods
H. Warnecke, Stuttgart University, Fraunhofer Institute for Production and Automation
G. Vettin, Fraunhofer Institute for Production and Automation

Least Cost Estimating with Group Technology
H. Smart, VSI Corp.

Economics of Assembly Systems
G. Boothroyd, University of Massachusetts

Report on CIRP International Seminar on Manufacturing Systems
J. Peklenik, University of Ljubljana

Volume 1/No. 2
1982

Recent Trends in Flexible Automated Manufacturing
W. Eversheim, P. Herrmann, Rheinisch-Westfalische Technical University

On Scheduling in a GT Environment
R. Vaithianathan, Kansas State University
K. McRoberts, Iowa State University

Production Decision Support System for Computerized Manufacturing Systems
P. Chen, J. Talavage, Purdue University

Two-dimensional Cutting Stock Problem Research: A Review and a New Rectangular Layout Algorithm
S. Israni, J. Sanders, University of Wisconsin-Madison

A Comparison of Adaptive Control Strategies for Hot Steel Strip Rolling Mills
A. Desrochers, Rensselaer Polytechnic Institute

Human Factors Facilitating the Implementation of Automation
A. Macek, Honeywell

An Economic Model for the Machining of Cast Parts
P. Egbelu, Syracuse University
R. Davis, R. Wysk, J. Tanchoco, Virginia Polytechnic Institute and State University

The Economic Value of Flexible Automation
G. Hutchinson, University of Wisconsin-Milwaukee
J. Holland, Allen-Bradley Co.

Volume 2/No. 1
1983

Economics of CNC Lathes
J. Bussmann, R. Granow, University of Hannover
H. Hammer, Deutsche Industrie Anlagen Gesellschaft (DIAG)

The MAPI Method—Its Effects on Productivity: An Alternative is Needed
R. Abbott, E. Ring, Virginia Polytechnic Institute and State University

Efficient Formulation of Computer Algorithms to Plan Machining Processes
W. Lewis, Rensselaer Polytechnic Institute
E. Barlett, Troy, New York
I. Finfter, Armament Development Authority
M. Barash, Purdue University

Design of a Semiautomated System for Capturing and Processing Shop Floor Information
G. Berry, D. Jung, Garrett Turbine Engine Co.
D. Bedworth, H. Young, Arizona State University

Explicit Programming Languages in Industrial Robots
G. Gini, Politecnico di Milano
M. Gini, University of Minnesota

Sensing System in an Experimental Robot
R. Cassinis, Politecnico di Milano

Design and Manufacture of Free-form Surfaces by Cross-sectional Approach
S. Razavi, D. Milner, University of Aston in Birmingham

CAM for Developing Nations
B. Brunak, Hughes Aircraft Co.

Report on CIRP International Seminar on Manufacturing Systems
J. Peklenik, University of Ljubljana

Volume 2/No. 2
1983

Machine Diagnostics in Automated Production
M. Weck, Rheinisch-Westfalische Technical University

Production System Design: A Directed Graph Approach
E. Passler, Fritz Heckert Research Institute
G. Hutchinson, University of Wisconsin-Milwaukee
K. Rudolph, W. Stanek, Fritz Heckert Research Institute

A Computer Simulation Study of Manual Flow Lines
D. Hira, Guru Nanak Engineering College
P. Pandey, University of Roorkee

CAD/Generative Process Planning with TIPPS
T. Chang, Purdue University
R. Wysk, Pennsylvania State University

Cellular Manufacturing Control
T. Greene, Virginia Polytechnic Institute and State University
R. Sadowski, Purdue University

Survey of Adaptive Control in Electro Discharge Machining
R. Snoeys, D. Dauw, J. Kruth, Katholieke Universiteit Leuven

Variable Gain Adaptive Control System for Turning
O. Masory, Texas A&M University
Y. Koren, Technion, Israel Institute of Technology

Replacement Decision Based on Productivity Analysis—An Alternative to the MAPI Method
L. Leung, J. Tanchoco, Virginia Polytechnic Institute and State University

Effect of Part Symmetry on Manual Assembly Times
Z. Yoosufani, IBM Corp.
M. Ruddy, Massachusetts Institute of Technology
G. Boothroyd, University of Massachusetts

Volume 3/No. 1
1984

A Design of a Controller as a Component of a Robotic Manufacturing System
P. Fussell, P. Wright, D. Bourne, Carnegie-Mellon University

A Sensor Based Technique for Automated Robot Programming
N. Duffie, J. Bollinger, L. Van Aken, R. Piper, J. Zik, C. Hou, K. Lau, University of Wisconsin-Madison

Modelling Flexible Manufacturing Systems Using Mean-Value Analysis
R. Suri, Harvard University
R. Hildebrant, Charles Stark Draper Laboratory

The Design of a Flexible Machining Cell for Small Batch Production
M. Cutkosky, P. Fussell, R. Milligan, Jr., Carnegie-Mellon University

Decision Support Requirements in Flexible Manufacturing
R. Suri, Harvard University
C. Whitney, Charles Stark Draper Laboratory

Integration of Job Shop Control Systems: A State-of-the Art Review
A. Ballakur, H. Steudel, University of Wisconsin-Madison

Pierce Point Minimization and Optimal Torch Path Determination in Flame Cutting
U. Manber, S. Israni, University of Wisconsin-Madison

Computer Aided Design of Form Rolls for NC Manufacture
D. Milner, University of Aston in Birmingham
K. Ng, Cad-Cam Systems Pte Ltd.

Report on CIRP International Seminar on Manufacturing Systems
J. Peklenik, University of Ljubljana

Volume 3/No. 2
1984

Using a CATS Database for Alternative Machine Loading
S. Hankins, Cincinnati Milacron
R. Wysk, Pennsylvania State University
K. Fox, Mead Data Central

High Level Planning and Control: An $IDEF_0$ Analysis for Airframe Manufacture
G. Mackulak, Arizona State University

Generating Pallet Loading Patterns with Considerations of Item Stacking on End and Side Surfaces
H. Steudel, University of Wisconsin-Madison

Shop Floor Control Using the Tactical Ratio and Monitoring System
H. Smart, VSI Corp.

CATC—A Computer Aided Tolerance Control System
R. Ahluwalia, Ohio State University
A. Karolin, General Motors Fisher-Guide Division

Investigations on Increasing Flexibility of Hardware and Software of Industrial Robots
H. Tonshoff, M. Schubert, K. Siemens, University of Hannover

Machine Tool Justification Policies: Their Effect on Productivity and Profitability
R. Fotsch, Briggs & Stratton Corp.

Volume 4/No. 1
1985

Automated Tool Management in Flexible Manufacturing
H. ElMaraghy, McMaster University

PATHSIM, A Modular Simulator for an Automatic Tool Handling System Evaluation in FMS
G. Crite, General Electric
R. Mills, Ingersoll Engineers
J. Talavage, Purdue University

Phase Change Fixturing for Flexible Manufacturing Systems
M. Gandhi, B. Thompson, Industrial Technology Institute

Process Intermittent Measurement of Tools and Workpieces
G. Hermann, Computer and Automation Institute

Automated Part Programming for CNC Milling by Artificial Intelligence Techniques
K. Preiss, Ben-Gurion University
E. Kaplansky, Man-Machine Cooperation Ltd.

Design of a Control System for a Flexible Manufacturing Cell
A. Costa, M. Garetti, Politecnico di Milano

A Compensation Method for the Dynamic Control of Robots
H. Van Brussel, L. Vastmans, Katholieke Universiteit Leuven

Report on CIRP International Seminar on Manufacturing Systems
J. Peklenik, University of Ljubljana

Computer Based (CAD/CAM) Drill Design System (Technical Note)
T. Greene, Virginia Polytechnic Institute and State University

Volume 4/No. 2 1985

Justifying Multimachine Systems: An Integrated Strategic Approach
N. Suresh, J. Meredith, University of Cincinnati

Flexible Manufacturing Systems—Manpower Problems and Policies
C. Kohler, R. Schultz-Wild, Institut fur Sozialwissenschaftliche Forschung

Design of Expert Systems for Integrated Production Automation
J. Tou, University of Florida

Control Principles in Flexible Manufacturing
C. Whitney, Charles Stark Draper Laboratory

An Adaptive Control Algorithm for Robotic Deburring
F. Puls, AT&T Bell Laboratories
M. Barash, Purdue University

A Thermal Model to Investigate the Wire Rupture Phenomenon for Improving Performance in EDM Wire Cutting
W. Dekeyser, R. Snoeys, M. Jennes, Katholieke Universiteit Leuven

Animated Simulation Graphics for a Manufacturing Conveyor System (Technical Note)
T. Barta, S. Chu, Iowa State University

A General Technique for Process Modeling (Technical Note)
A. Desrochers, Rensselaer Polytechnic Institute

CAM Pilot Plant for Mexico (Technical Note)
B. Brunak, Consulting Engineer

Volume 5/No. 1 1986

Planning for Machining in a Multijob, Multimachine Manufacturing Environment
P. Egbelu, Pennsylvania State University

A Proposed Hierarchical Control Model for Automated Manufacturing Systems
A. Jones, C. McLean, National Bureau of Standards

Management of Component Accumulation in Small-Lot Assembly Systems
W. Wilhelm, L. Wang, Ohio State University

A Systems Approach to Task Allocation of Human-Robot Interaction in Manufacturing
B. Ghosh, University of Wisconsin-Milwaukee
M. Helander, State University of New York at Buffalo

An Analytical Quadratic Model for the Geometric Error of a Machine Tool
P. Ferreira, C. Liu, Purdue University

A FMS Physical Simulator (Technical Note)
B. Khoshnevis, A. Kiran, University of Southern California

Volume 5/No.2 1986

Design of a Cellular Manufacturing System: A Syntactic Pattern Recognition Approach
H. Wu, R. Venugopal, M. Barash, Purdue University

Decision Support in Flexible Manufacturing Systems Using Timed Petri Nets
R. Ravichandran, Indiana University
A. Chakravarty, University of Wisconsin-Milwaukee

Applications of Microcomputers in Automated Process Planning
H. Wang, R. Wysk, Pennsylvania State University

An Intermediate Resource Planning Methodology
G. Saul, Cincinnati Milacron
R. Sadowski, Purdue University

Batching and Capacity Models for Manufacturing Cells with Metered Flow
I. Baybars, Carnegie-Mellon University
F. Bogaert, Booz Allen & Hamilton
G. Hirsch, Ingersoll-Rand Co.
S. Kekre, Carnegie-Mellon University

Report on CIRP International Seminar on Education and Training for Manufacturing Systems and Computer Integrated Manufacturing
J. Peklenik, University of Ljubljana

Nonhierarchical Control of Manufacturing Systems (Technical Note)
N. Duffie, R. Piper, University of Wisconsin-Madison

Volume 5/No. 3 1986

An Approach for Designing Capacity and Managing Material Flow in Small-Lot Assembly Lines
W. Wilhelm, S. Saboo, Ohio State University
R. Johnson, Battelle Memorial Institute

Synchronization of Operations in a Flexible Manufacturing Cell: The Petri Net Approach
A. Merabet, National Research Council Canada

Cell Concepts for Flexible Automated Manufacturing
G. Spur, G. Seliger, B. Viehweger, Fraunhofer Institute for Production and Automation

SIMSHOP: A Job Shop/Cellular Manufacturing Simulator
H. Steudel, University of Wisconsin-Madison

Simulation Analysis of the Performance of Tunnel-Gated Stations for Free-Transfer Assembly Systems
W. Leung, J. Sanders, University of Wisconsin-Madison

The Effect of CAM Technologies on Training Activities
A. Majchrzak, Purdue University

Volume 5/No. 4 1986

Analysis of a Service Center in a Multiline Factory
S. Albin, Rutgers University
D. Burman, AT&T Engineering Research Center
S. Sathaye, AT&T Bell Laboratories

Multiobjective Cluster Analysis for Part Family Formations
C. Han, I. Ham, Pennsylvania State University

A Generalized Shape Descriptor from Wire Frame Models on a CAD/CAM System
B. Nnaji, A. Vishnu, University of Massachusetts

Automated Design of Modular Fixtures for Flexible Manufacturing Systems
M. Gandhi, B. Thompson, Industrial Technology Institute

The Application of Lognormal Models of Transient Operations in the Flexible Manufacturing Environment
W. Wilhelm, Ohio State University

A Formulation of the Integrated Facility Layout, Product Selection and Process Planning Problem (Technical Note)
R. Askin, University of Arizona

Volume 6/No. 1 1987

Implementing the Automated Factory
J. Meredith, University of Cincinnati

Effect of Process Unreliability on Integrated Manufacturing/Production Systems
M. Lulu, University of South Florida
J. Black, Auburn University

A Case Study in Parallel Unrelated Machine Scheduling: A Heuristic Approach
M. Dessouky, University of Illinois at Urbana-Champaign
Y. Dessouky, Arizona State University
M. Dessouky, Pritsker and Associates

Integration of a Group Technology Classification and Coding System with an Engineering Database
R. Billo, R. Rucker, D. Shunk, Arizona State University

Optimization of a Complex Flow Line for Printed Circuit Board Fabrication by Computer Simulation
L. Lin, J. Cochran, Arizona State University

Controlling Residual Vibration of Robotic Structures (Technical Note)
M. Stojkov, W. Atherton, P. Flanagan, A. Messuri, Cleveland State University

Volume 6/No. 2 1987

Managing Factory Automation Projects
J. Meredith, University of Cincinnati

Extensions of Production Flow Analysis
J. Dekleva, D. Menart, University Edvard Kardelj Ljubljana

Advantages of Scaled and Unscaled Physical Models for FMS Research and Instruction
R. Wysk, P. Cohen, Pennsylvania State University
B. Ghosh, University of Wisconsin-Milwaukee
S. Wu, Lehigh University

Efficient Solving of the Group Technology Problem
A. Kusiak, W. Chow, University of Manitoba

Real-time Operational Control of Flexible Manufacturing Systems
O. Maimon, Tel Aviv University

Knowledge-based Economic Analysis of Manufacturing Systems
E. Fisher, North Carolina State University
S. Nof, Purdue University

Graphic Interactive Simulation for the Planning of Manufacturing Systems (Technical Note)
W. Eversheim, H. Thome, University of Technology, Aachen

Volume 6/No. 3
1987

Capacity Analysis of a Manufacturing Cell
U. Karmarkar, University of Rochester
S. Kekre, Eastman Kodak Co.
S. Kekre, Carnegie-Mellon University

Computer Integrated Manufacturing System Control: A Data Flow Approach
W. Lewis, University of Washington
M. Barash, J. Solberg, Purdue University

Economic Measure of Productivity, Quality and Flexibility in Advanced Manufacturing Systems
Y. Son, C. Park, Auburn University

Pull Versus Push Strategy for Automated Guided Vehicle Load Movement in a Batch Manufacturing System
P. Egbelu, Pennsylvania State University

Range Expansion and Automation of a Classical Profilometer
M. Chuard, J. Mignot, Laboratoire de Biologie Cutanee
P. Nardin, D. Rondot, Institut Universitaire de Technologie

Report on the 18th CIRP International Seminar on Manufacturing Systems
J. Peklenik, University of Ljubljana

An Adaptive Real-time Intelligent Seam Tracking System (Technical Note)
N. Nayak, A. Ray, A. Vavreck, Pennsylvania State University

Volume 6/No. 4
1987

Flexible Automated Machining in France: Results of a Survey
G. Margirier, Institut de Recherche Economique et de Planification du Developpement

Microcomputer Simulation Improves Production Scheduling for Microelectronics Manufacturers
S. Economides, California State University
F. Cunningham, United Airlines

Integration of Data and Knowledge in Manufacturing Enterprises: A Conceptual Framework
C. Hsu, Rensselaer Polytechnic Institute
C. Skevington, Factory Automation and Computer Technologies

Knowledge Based Routing and Sequencing for Discrete Part Production
D. Ben-Arieh, Ben-Gurion University
C. Moodie, Purdue University

Heuristic Methods for Flexible Flow Line Scheduling
S. Kochhar, Harvard University
R. Morris, AT&T Bell Laboratories

Manufacturing Configuration, Capacity and Mix Decisions Considering Operational Costs
U. Karmarkar, University of Rochester
S. Kekre, Carnegie-Mellon University

An Heuristic to Evaluate Investments for Improved Economies of Scope in Manufacturing (Technical Note)
D. Curtis, David A. Curtis & Associates

Computer Integrated Manufacturing Education and Research (Manufacturing Education Note)
H. ElMaraghy, McMaster University

Individual back issues can be ordered through the Society of Manufacturing Engineers, Publications Sales Department, One SME Drive, P.O. Box 930, Dearborn, Michigan 48121, 313/271-1500 ext. 418. Price: $25 (non-member)/$20 (member)/issue.
